MODEL 2417

KYORITSU ELECTRICAL INSTRUMENTS WORKS, LTD.
**FEATURES**

- Model 2417 offers True RMS measurement capability.
- Designed for measurements of AC leakage and AC current with five ranges from 200 mA to 500 A. AC 200mA range provides a high resolution of 0.1 mA.
- Least affected by external magnetic field.
- Provides dual frequency responses of fundamental 50/60 Hz only or up to 1 kHz. The frequency response of up to 1 kHz permits measurements of current with harmonics superimposed on the fundamental frequency. High frequency current from appliances such as inverters, switching regulators etc. can therefore be measured.
- Designed to international safety standard (IEC1010 Voltage CATII)
