1. SAFETY WARNINGS

This instrument has been designed and reviewed in accordance with IEC 61010-0. Safety precautions are provided for safe operation of the instrument. The instrument is to be used only in its intended applications and conditions. The use of this instrument is subject to the following precautions.

1.1. General Precautions

- The instrument is intended for use in a dry environment, such as an office or laboratory. Do not use the instrument in a dusty or wet environment.
- Do not use the instrument in an environment where flammable gases or hazardous substances are present.
- Do not use the instrument in an environment where there is a risk of explosion.
- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

1.2. General Precautions

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

1.3. General Precautions

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

2. Warnings

- Make sure that all parts are included in the delivery and that all parts are in good condition.
- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

3. Specifications

- The instrument is to be used only in its intended applications and conditions. The use of this instrument is subject to the following precautions.
- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

4. How to Measure Voltage

- Use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

5. Preparations for Measurement

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

6. Features

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

7. Other Functions

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

8. Battery Replacement

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

9. Maintenance

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

10. Troubleshooting

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

11. Specifications

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

12. Accessories

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

13. Dimensions

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

14. Standard

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.

15. Glossary

- Do not use the instrument in an environment where there is a risk of electrical shock.
- Do not use the instrument in an environment where there is a risk of injury.
- Do not use the instrument in an environment where there is a risk of damage to the instrument.
