2. Installing "KEW Windows for KEW5050"

   [For Windows 7]
   1. Check the followings before installing this software.

      To prepare your system for installation, please close all open programs.

      - Be sure NOT to connect the instrument to the PC until installation completes.

      - Installation shall be done with Administrator right.

      - To use KEW Windows for KEW5050, "NET Framework 3.5/4.6" is required. If "NET Framework 3.5/4.6" is not installed in your PC, it will be automatically installed when installing this software. Internet connection is required to install "NET Framework 3.5/4.6".

   2. Insert the CD-ROM in your PC's CD-ROM Drive.

      Click the "Run KEWSetupLauncher2.exe" when the "AutoPlay" pop-up window appears.

      Double-click "KEWSetupLauncher2.exe" in the CD icon if the installer doesn't run automatically. If the User Account Control dialog box appears, click "Yes".

   3. If a message requiring restarting your computer is displayed, click "Yes" and restart your computer. Installation process will then restart.

   4. Click "Next" after entering the user information and other supplementary information.

   5. Confirm the information on installation, and then click "Install" to start an installation.

      If a message requiring restarting your computer is displayed, click "Yes" and restart your computer. Installation process will then restart.

   6. Click "Finish" when "InstallShield Wizard Complete" dialog box appears.

3. If neither 7 nor 3 appears, run "KEWSetupLauncher2.exe" from the CD.

   1. The followings should be checked before installing this software.

      - To prepare your system for installation, please close all open programs.

      - Be sure NOT to connect the instrument to the PC until installation completes.

      - Installation shall be done with Administrator right.

      - To use KEW Windows for KEW5050, "NET Framework 3.5/4.6" is required. If "NET Framework 3.5/4.6" is not installed in your PC, it will be automatically installed when installing this software. Internet connection is required to install "NET Framework 3.5/4.6".

   2. Insert the CD-ROM in your PC's CD-ROM drive.

      Then the following pop-up will appear at the upper right on the screen.

      Left-click on this box.

   3. Click and select "Run KEWSetupLauncher2.exe" when the following box appears. If User Account Control dialog box appears, click "Yes".

   4. Read through and understand the License Agreement and click "I accept ...", and then click "Next".

   5. Click "Next" after entering the user information and other supplementary information, and click "Next".

   6. Click "Finish" when "InstallShield Wizard Complete" dialog box appears.

   7. When the installation wizard completes, subsequent installation initiates automatically.

      If you rebooted your PC at step 5, double-click the CD drive at "My computer" to show the following window.

   8. Ensure that internet connection is established, otherwise the installation of this software may be incomplete.

   9. Confirm the information on installation, and then click "Install" to start installation.

   10. Click "Finish" when "InstallShield Wizard Complete" dialog box appears.
The following box will appear if .NET Framework 3.5 is not installed in your PC.

If a message requiring restarting your PC is displayed, click "Yes" and restart your PC. Run "KWEVSetupLauncher2.exe" from the CD after restarting the PC.

When the installation wizard completes, installation of KEW Windows for KEW5050 initiates automatically.

When KEW Windows for KEW5050 has been successfully installed in your computer, the following dialog box appears to start installing the USB driver. Click "Next".

If the following Security Warning message appears, click on the "Install this driver anyway". (It is no problem to continue installing because operation has already been verified.)

Installation completes when the following window appears. Click "Finish".

The USB driver has been successfully installed. Power on KEW5050 first, and then connect to your PC.

The main window for "KEW Windows V2" appears. Select "KEW5050" and click "Start" or double click on "KEW5050" to get the KEW5050 started. Click "Close" or close button (x) on the right-top to end the program.

To restart the interrupted USB driver installation process, right click on the CD drive and click "Open". Click and start "kewusb101_setup.exe" in the "DRIVER" folder.

For further instructions, please read the instruction manual. Click (Double click) the desktop shortcut to "KEW Windows for KEW5050 MANUAL".

For Windows 8/10

When KEW Windows for KEW5050 has been successfully installed in your PC, the following dialog box appears to start installing the USB driver. Click "Next".

Read through and understand the End User License Agreement and click "I accept...", and then click "Next".

The USB driver has been successfully installed. Power on KEW5050 first, and then connect to your PC.

To restart the interrupted USB driver installation process, right click on the CD drive and click "Open". Click and start "kewusb101_setup.exe" in the "DRIVER" folder.

MEMO

* How to un-install the PC Software:
Access to the "Control Panel" and double click on the "Add/ Remove Programs" to remove the "KEW Windows V2" and "KEW Windows for KEW5050".

The main window for "KEW Windows V2" appears. Select "KEW5050" and click "Start" or double click on "KEW5050" to get the KEW5050 started. Click "Close" or close button (x) on the right-top to end the program.

To restart the interrupted USB driver installation process, right click on the CD drive and click "Open". Click and start "kewusb101_setup.exe" in the "DRIVER" folder.
